

SynerMaX

Specification

Model Name	SynerMax
Ultrasound Applicator	Mode A(3.0mm), Mode B(4.5mm), Mode C(9mm)
ESWT Applicator	15mm
Power Consumption	350VA
Voltage	AC220V, 60Hz
Weight	55kg
Dimension(W x D x Hmm)	425 X 639 x 1245

For all your shapes
SynerMaX

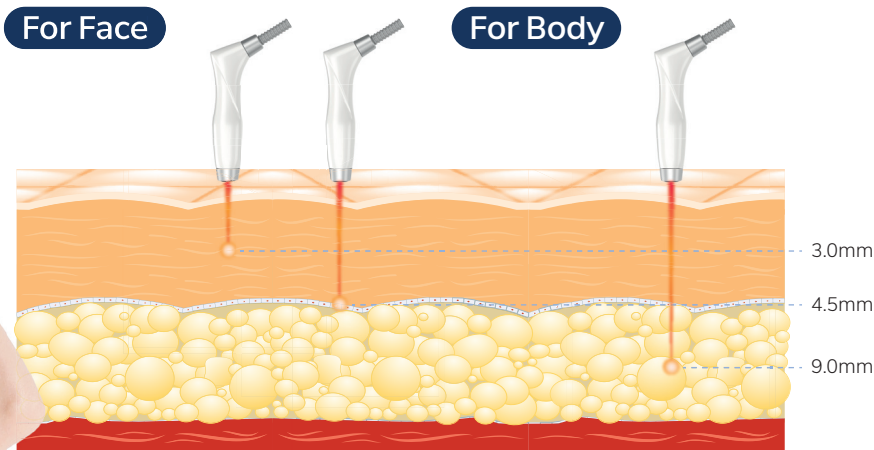

Any fashion, any pose, any angle

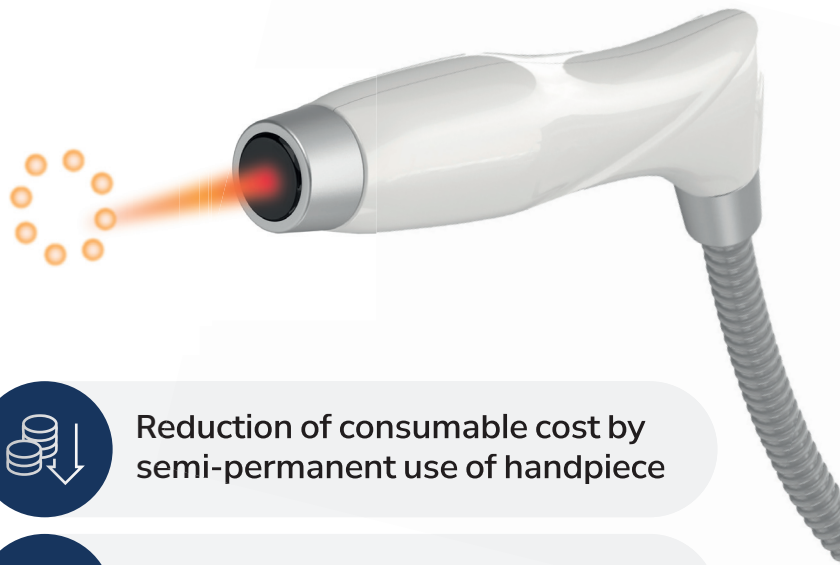

All of your shapes must be perfect.

You can take care of your shape with SynerMax's 2 types of ultrasonic handpiece for face lifting, ultrasonic handpiece for body slimming, and Syner handpiece developed through technological convergence.

Ultrasound Handpiece

When the ultrasonic energy is concentrated and a thermal coagulation point is generated in the target area, protein denaturation occurs in the area, resulting in lifting effect due to **fascia contraction**, **dermal regeneration**, and **fat cell necrosis in the fat layer**.

-  Reduction of consumable cost by semi-permanent use of handpiece
-  Clear effect with precise targeting
-  Rubbing type enables quick and delicate treatment

Our Technology Convergence!!

Introducing the Syner Handpiece.

Obesity comes in many forms. It is especially prone to bumpy cellulite. This is much more aesthetically pleasing than simple obesity and is a concern for many women. When everyone focuses on the fat layer of obesity, we reduce the volume of the fat layer and improve cellulite! Syner Handpiece was developed to solve both of these concerns.

SynerHandpiece for Body

Focus Type E.S.W.T	<ul style="list-style-type: none">- Relieves cellulite by increasing blood circulation and increasing microvessels- Regenerate collagen by stimulating fibroblasts- Cavitation effect reduces neutral fat by destroying fat cell membrane
Focus Type Ultrasound	<ul style="list-style-type: none">- Adipocyte necrosis by formation of a thermal coagulation point at -65 degrees

-  Fully simultaneous operation of focused extracorporeal shock wave and focused ultrasound
-  Cellulite and obesity problems solved with one handpiece
-  Quick treatment for a wide range of areas of concern by providing a large handpiece
